

DSA

- 1) Find out all the list of companies which are conducting placement drive using DSA
- 2) What is the syllabus of DSA in GATE
- 3) Find out what are the set of variables in amazon invoice bill
- 4) variables & datatypes in gas bill & current bill

~~products~~

- 1) Google, microsoft, Amazon, Adobe, uber, flipkart, zomato, swiggy, paytm, phonepe, TCS, Infosys, Wipro, ~~enao~~ cognizant, IBM, Dell, HP, meesho

- 2) 1) programming and Data structures

- programming in C (control structures, functions, recursions, pointers)

Data structures : Arrays, stacks & queues,

linked lists (singly, doubly, circular), Trees.

(Binary trees, BST, traversals - in order / pre order / post order), Binary search Trees, Binary Search Trees, Binary Heaps, graphs (representation - adjacency list / matrix)

Algorithms : sorting, searching, Asymptotic worst-case time & space complexity, Algorithm design techniques, Graph algorithms.

Variables in amazon

- 1) String Email-id
- 2) ~~longit~~ phone-number → unsigned longit
- 3) ~~longit~~ ~~string~~ password (OTP) → unsigned longit
- 4) String search-item
- 5) address → string
- 6) String user-name
- 7) reviews → string
- 8) ~~string details~~
- 8)

Ticket

- 1) Bus name
- 2) Bus number
- 3) Starting point
- 4) departure point
- 5) Tracking ID
- 6) price
- 7) Date
- 8) Day month
- 9) year
- 10) day
- 11) Time

Variables in amazon invoice bill

- | | |
|--------------------------------------|----------------------------------|
| 1) seller name | 24) Tax Type |
| 2) seller address | 25) Tax Amount |
| 3) PAN NO | 26) Total amount of each product |
| 4) GST Registration No | 27) Total |
| 5) order Number | 28) Amount in words |
| 6) order date | |
| 7) Biller name | |
| 8) Biller address | |
| 9) state / OT code (biller) | |
| 10) Reciver name | |
| 11) shipping address | |
| 12) state / OT code (Receiver) | |
| 13) Place of supply | |
| 14) place of delivery | |
| 15) Invoice Detail Number | |
| 16) Invoice details | |
| 17) Invoice date | |
| 18) SI / NO | |
| 19) product Description | |
| 20) Unit price | |
| 21) Qty | |
| 22) Net Amount | |
| 23) Tax Rate | |

Variables in gas bill

- 1) Consumer NO.
- 2) Distributor serial No
- 3) Name
- 4) Address
- 5) order NO $\rightarrow$ string
- 6) order Date
- 7) Connecting Type
- 8) Subsidy Consumed
- 9) KG $\rightarrow$ string
- 10) price
- 11) CGST $\rightarrow$ float
- 12) SGST
- 13) Final price
- 14) Tax Invoice NO

15) Tax Invoice date

16) order status

17) order type

18) Issue dt.

Variables in current bill

- | | | |
|---------------------------|------------------|--------------------|
| 1) BILL NO | 11) Name | 24) units |
| 2) DT | 12) addr | 25) Avg |
| 3) Time | 13) GAT | 26) Energy charges |
| 4) ERO NO | 14) SC | 27) cust. charges |
| 5) Name (office) | 15) PIT | 28) ED |
| 6) SEC Name | 16) Load | 29) ED interest |
| 7) GRP | 17) MF | 30) ADDL. charges |
| 8) SC NO | 18) PRES Reading | 31) INT. ON ACD |
| 9) USC NO | 19) PRES month | 32) BILL amount |
| 10) Area $\rightarrow$ id | 20) PRES status | 33) ADJ. amount |
| | 21) PRev Reading | 34) Loss |
| | 22) PRev month | |
| | 23) PRev status | |

35) NET Amount

36) ARREARS UP TO Date :

37) ARREARS From Date :

38) Total amount

39) ACD DUE

30) AGI services due

31) Total amount due

32) due for payment

33) Due for disconnection

34) Last paid date

35) AAO cell no

36) ADE cell no

37) structure code

1) Read n no of elements in an array start

~~del the value~~ del the value as per the

user req^{re} the user inputs index of an

array that value is replaced with -1

continuously ask the user the indices to

del the values as long as the users choice is

yes . stop this process when users choice is

No (or) all the array values are del.

2) Consider an array of size n store the values
basing on the value in ^{its} units position

Ex: 32 should be stored in 2nd location

56 is stored in 6th location

78 should be stored in 8th location

If there is a tie (or) more than one element
is mapped to same location then store
the new value in the next ^{immediate} ~~immediate~~
location of its ^{previous} ~~prev~~ value
